EV3401 Multi-sensor

Universal controllers with one regulation output for industrial applications

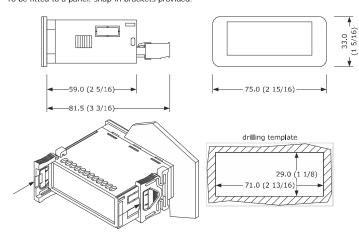

- power supply 230 VAC or 12-24 VAC/DC (according to the model)
- multi-sensor input (PTC/NTC/J/K/Pt 100/Pt 1000/Ni 120/0-20 mA/4-20 mA/0-10 V/
- multi-purpose input
- K1 relay 16 A res. @ 250 VAC
- TTL MODBUS slave port for programming key or for TTL/RS-485 (BMS) serial interface
- hot or cold mode regulation

MEASUREMENTS AND INSTALLATION

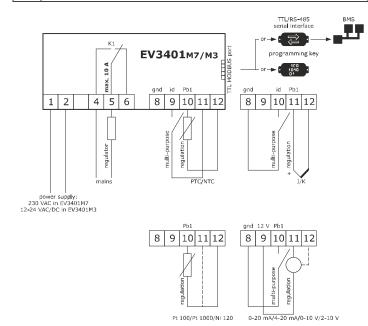

Measurements in mm (in); 59.0 (2 5/16) depth with fixed screw terminal blocks, 81,5 (3 3/16) depth with plug-in screw terminal blocks To be fitted to a panel, snap-in brackets provided

- the thickness of the panel must be between 0.8 and 2.0 mm (1/32 and 1/16 in); ensure that the working conditions are within the limits stated in the TECHNICAL
- SPECIFICATIONS section;
- do not install the device close to heat sources, equipment with a strong magnetic field, in places subject to direct sunlight, rain, damp, excessive dust, mechanical vibrations
- in compliance with safety regulations, the device must be installed properly to ensure adequate protection from contact with electrical parts. All protective parts must be fixed in such a way as to need the aid of a tool to remove them.

2 ELECTRICAL CONNECTION

- use cables of an adequate section for the current running through them. ensure that the thermocouple is properly insulated from contact with metal parts or $\frac{1}{2}$ use already insulated thermocouples.
- if necessary, extend the thermocouple cable using a compensating cable. to reduce any electromagnetic interference locate the power cables as far away as possible from the signal cables

- if using an electrical or pneumatic screwdriver, adjust the tightening torque if the device has been moved from a cold to a warm place, humidity may have caused condensation to form inside. Wait about an hour before switching on the power;
- make sure that the supply voltage, electrical frequency and power are within the set limits. See the section TECHNICAL SPECIFICATIONS;
- disconnect the power supply before carrying out any type of maintenance; do not use the device as safety device;
- for repairs and for further information, contact the EVCO sales network

Install following the instructions given in the section MEASUREMENTS AND

- Power up the device as set out in the section ELECTRICAL CONNECTION: an internal test will start up.
- The test normally takes a few seconds; when it is finished the display will switch off. Configure the device as shown in the section Setting configuration parameters

	Recomm	mended configuration parameters for firs	ended configuration parameters for first-time use.					
PAR.	DEF.	PARAMETER	MIN MAX.					
SP	0.0	setpoint	r1 r2					
PO	2	type of probe	0 = PTC 1 = NTC					
		set the parameter before	2 = J 3 = K					
		connecting the probe	4 = Pt 100 3 wires 5 = Pt 100 3 wires					
			6 = Pt 1000 3 wires 7 = Pt 1000 3 wires					
			8 = 4-20 mA 9 = 0-20 mA					
			10= 2-10 V 11= 0-10 V					
			12= Ni 120 3 wires 13= Ni 120 2 wires					
P2	0	temperature measurement unit	0 = °C 1 = °F					
r5	0	hot or cold mode regulation regulator	0 = cold mode					
			1 = hot mode					

Then check that the remaining settings are appropriate; see the section CONFIGURATION PARAMETERS.

- Disconnect the device from the mains.
- Make the electrical connection as shown in the section ELECTRICAL CONNECTION without powering up the device.
- When connecting to an RS-485 network, connect the EVIF22TSX interface; see the relative instruction sheets.

Power up the device

4 USER INTERFACE AND MAIN FUNCTIONS temperature unit on/stand-by -out i regulator < °C * ۰F % outa O alarm -Bor pressure unit **≙**SET FNC V ON/STAND-BY, keypad lock escape additional functions

Switching the device on/off

If POF = 1 (default), touch the ON/STAND-BY key for 4s. (1)

If the device is switched on, the display will show the P5 value ("regulation temperature" if the display shows an alarm code, see the section ALARMS LED ON regulator protection active regulator active OUT1 setpoint being set unused * unused OUT2 alarm active △ device switched off device switched on device being switched on/off (1) temperature display percentage display pressure display

When 30s have elapsed without the keys being pressed, the display will show the "Loc" label and the keypad will lock automatically

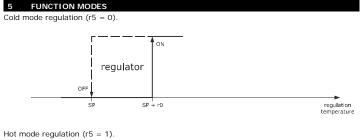

Unlocking the keypad

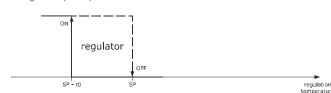

Touch a key for 1s: the display will show the label "UnL".

Setting the setpoint Check that the keypad is not locked.

1.	≙SET	Touch the SET key: the display will show the label "SP".
2.	₹ FNC ✓	Touch the UP or DOWN key within 15s to set the value within the limits r1 and r2 (default "0 350").
3.	_ ≙SET	Touch the SET key (or take no action for 15s).

Silencing the buzzer (if A13 = 1) Touch a key.

6	ADDI TI	ONAL FUNC	CTIONS			
6.1 Displaying the number of start-ups of the relay						
Check that the keypad is not locked.						
1.	FNC V		Touch the DOWN key for 4s.			
2.			Touch the UP or DOWN key within 15s to select a label.			
	LAB. DESCRIPTI		ON			
nS1 display of the		display of th	ne number of start-ups of the K1 relay in thousands			
3.	29	SET	Touch the SET key.			
4.	1 (Ů	Touch the ON/STAND-BY key (or take no action for 60s) to exit the procedure.			

6.2 Displaying the temperature detected by the regulation probe Check that the keypad is not locked.

Touch the DOWN key for 4s. Touch the UP or DOWN key within 15s to select a label. LAB. DESCRIPTION Pb1 regulation temperature

Touch the SET key. **≙**SET Touch the ON/STAND-BY key (or take no action for 60s) to exit the procedure

SETTINGS 7.1 Setting configuration parameters

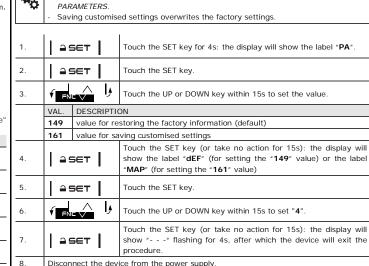

Changing parameter P2 from °C to °F (and vice versa) causes the value of the parameters whose unit of measurement is °C or °F to be changed automatically.

			<u> </u>
-	1.	a set	Touch the SET key for 4s: the display will show the label "PA".
-	2.	à SET	Touch the SET key.
1	3.	f FNC V	Touch the UP or DOWN key within 15s to set the PAS value (default "-19").
	4.	≙ SET	Touch the SET key (or take no action for 15s): the display will show the label "SP".
V	5.	₹ FNL	Touch the UP or DOWN key to select a parameter.

≙ SET وا Touch the UP or DOWN key within 15s to set the value. 8. Touch the SET key (or take no action for 15s). Touch the SET key for 4s (or take no action for 60s) to exit the 9. ≙ SET

Check that the factory settings are appropriate; see the section CONFIGURATION

7.2 Restoring factory settings (default) and saving customised settings

	_	-INE V		T			
7.	ے ا	SET	1	Touch the SET key (or take no action for 15s): the display will show " " flashing for 4s, after which the device will exit the			
	٠,		ı	procedure.			
8.	Disc	onnect	the dev	ice from the power supply.			
9.	1	SET		Touch the SET key for 2s before action 6 to exit the procedure			
	'		•	beforehand.
